Animal Control Office
at: (252) 745-3203

The rabies virus is a real and deadly threat to you and your family. A person that has become infected with the rabies virus, would die without treatment.

Pamlico County has reported several confirmed cases within the last couple of years. So we are here to aid the wellbeing of your whole family as well as your pets.

Getting your beloved pets vaccinated is the best prevention that you can have against this deadly disease, for them as well as for yourself.

Show your family and your pets that you care by bringing them to attend one of our clinics made possible each year by several veterinarians from our very own county.

MAKE YOUR PETS PAMLICO STRONG!

- ◆ **Dogs, Cats, and Ferrets** must be at least 4 months of age
- ◆ **Cats and ferrets must** be in a carrier
- ◆ **Dogs must** be on a leash
- ◆ **Keep all animals in your vehicle AT ALL TIMES** (the vet will come to your vehicle when it's your turn)
- ◆ **Bring proof of last rabies vaccination, if available**

IT'S THE LAW!!
