System Pressure Advisory

The water consumers of Pamlico County Water System have experienced periods of low pressure and outages in the distribution system due to a waterline break. Water department contractors made repairs to the damaged area. The following areas are covered under the advisory:

Residents on Cowell Ln, Caroline St., Pine Ln., South St. from 302 to 507, Bill St., Hatsell Dr., Anderson Dr., South 3rd St., and Neals Creek Rd. This includes any other adjacent roads.

Periods of low or no pressure in the distribution system increases the potential for back siphonage and introduction of bacteria into the water system.

Therefore, the Pamlico County Water Department advises that when water is restored consumers **boil all water** used for human consumption (including drinking, cooking, brushing teeth, making ice and washing hands) or use bottled water.

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

This office is strongly urging the water consumers to conserve water whenever possible. This advisory remains in effect until further written notification is issued.

This advisory issued on January 5, 2021.
