PAMLICO COUNTY
Water System Pressure Advisory!

The water consumers of Pamlico County Water System are experiencing periods of low pressure and outages in the distribution system due to a waterline repair. Water department contractors are making repairs to the system. The following area is covered under the advisory:

- 1882 Olympia Road to 2649 Olympia Road, Craven County Road, Old Cross Road, all of Shinglebrook Subdivision, and all adjoining roads off of the abovementioned roads.

Periods of low or no pressure in the distribution system increases the potential for back siphonage and introduction of bacteria into the water system.

Therefore, the Pamlico County Water Department advises that when water is restored consumers **boil all water** used for human consumption (including drinking, cooking, brushing teeth, making ice and washing hands) or use bottled water.

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

This office is strongly urging the water consumers to conserve water whenever possible. This advisory remains in effect until further written notification is issued.

This advisory is issued on September 19, 2018.

Water is available for pickup at the Reelsboro Fire Department.
