

PAMLICO COUNTY EMERGENCY SERVICES

Pamlico County COVID-19

Case Updates

April 15th, 2020 15:00 Hours

Two (2) of the Three (3) current active positive COVID-19 Cases in Pamlico County have been deemed by Public Health officials as **RECOVERED** and are off required isolation measures. The necessary isolation requirements are being free of COVID-19 symptoms and fever without fever reducing medications for a minimum of 72 consecutive hours. The recovered patients are now able to continue with daily functions. These positive cases of COVID-19 were determined to be related to travel outside of Pamlico County along with direct contact of other positive COVID-19 person(s). Contact tracing conducted by Pamlico County Health Department produced no public exposure from these cases.

Pamlico County at this time has no new Positive cases, One (1) **ACTIVE** Case in Isolation, and Five (5) cases listed as **RECOVERED**.

We encourage all citizens not only locally but state and nationwide to assist with flattening the COVID-19 positive curve by practicing social distancing, personal hygiene, virtual means and methods of communications, and continue to follow recommendations and guidelines from Official Local, State and National Sources.

Chris Murray, Director
